Contents

1	Introduction	5
2	Getting Started	7
3	Accessing Data	9
4	Processing and Tidying Data	11
5	Data Visualization	13
6	Linear Models (Regression and ANOVA)	15
7	Linear Mixed Effects Models	17
8	Social Network Analysis	19
9	Factor Analysis	21
10	Latent Variable Models	23
11	Natural Language Processing	25
12	Cluster Analysis	27
13	Reproducibility	29
14	Communicating	31

Chapter 1

Introduction

Chapter 2

Getting Started

Very important things.

Chapter 3

Accessing Data

Chapter 4

Processing and Tidying Data

We describe our methods in this chapter.

Chapter 5

Data Visualization

We have finished a nice book.

Chapter 6

Linear Models (Regression and ANOVA)

Some *significant* applications are demonstrated in this chapter.

Chapter 7

Linear Mixed Effects Models

Chapter 8

Social Network Analysis

Chapter 9

Factor Analysis

Chapter 10

Latent Variable Models

Chapter 11

Natural Language Processing

Chapter 12

Cluster Analysis

Chapter 13

Reproducibility

Chapter 14

Communicating

Bibliography
